
My Portfolio

— Santosh Poudyal —

Development Process

1. Prepare a trello - outline key steps in the development
2. Come up with a design - make sure I have enough skill to implement the design
3. Make wireframe
4. Code
5. Test - corss-browser and cross-device

Tools I have used

1. HTML
2. CSS
3. SASS
4. Java Script
5. jQuery
6. FormSpree

Challenges

Web development is a never ending job when you are a client and, at the same time, a developer.

Equipping myself with necessary skill to meet my own requirements.

Make website look professional.

Tested on the following devices

320 px width screen - iphone 5/SE

600px width screen - Nexus 7 devices

1024px width screen - ipad/landscape

Normal desktop devices
